<p><u>Abstract</u></p> <p>Extracted from the Field Work Instruction Manual NRU HIES 2013 (Attached):</p> <p>1.2 Objectives</p> <p>The purpose of the HIES survey is to obtain information on the income, consumption pattern, incidence of poverty, and saving propensities for different groups of people in Nauru. This information will be used to guide policy makers in framing socio-economic developmental policies and in initiating financial measures for improving economic conditions of the people. Some more specific outputs from the survey are listed below:</p> <ol style="list-style-type: none"> To obtain expenditure weights and other useful data for the revision of the consumer price index; To supplement the data available for use in compiling official estimates of household accounts in the systems of national accounts; To supply basic data needed for policy making in connection with social and economic planning; To provide data for assessing the impact on household living conditions of existing or proposed economic and social measures, particularly changes in the structure of household expenditures and in household consumption; To gather information on poverty lines and incidence of poverty throughout Nauru. 	
Kind of Data	Sample survey data [ssd]
Unit of Analysis	<ul style="list-style-type: none"> - Households - Individuals - Expenditure items

Scope & Coverage

Scope

Extracted from the Cover pages of the Questionnaire Modules:

Module 1 - Demographic Information:

- Demographic profile
- Labour Force Status
- Occupation History
- Dwelling information
- Dwelling tenure expenditure

Module 2 - Household Expenditure:

- Utilities & Communication

- Utilities & Communication expenditure
- Land & Housing
- Land & Housing expenditure
- Household Assets
- Household Assets expenditure
- Vehicles
- Vehicles expenditure
- Household Services expenditure
- Provision of Financial Support
- Contribution to ceremonies
- Personal Loans

Module 3 - Individual Expenditures:

- Educational status
- Education
- Education expenditure
- Health status
- Health
- Health expenditure
- Private Travel
- Private Travel expenditure
- Clothing
- Clothing expenditure
- Communication
- Communication expenditure

Module 4 - Income:

- Work for wage or salaries
- Wages detailed
- Income from non agriculture business
- Description of agricultural activities
- Income from agriculture business
- Description of handicraft & home processed food activities
- Income from handicraft & home processed food activities
- Description of livestock activities
- Income from livestock activities
- Description of fishing activities
- Income from fishing activities
- Property & Transfer Income and Other Receipts
- Remittances

Weekly Diary - Covering 14 Days (2 weeks):

- Food items bought this day
- Non food items and services bought this day
- Items for free
- Gambling wins & losses

Time Period(s)	2012-2013
Countries	Nauru
Universe All Households in the Selected Sample Size.	

Producers & Sponsors

Sampling

Sampling Procedure

Extracted from the Palau HIES Survey Plan (Attached):

3. Survey Design & Methodology

3.1 Description of Study Area

The survey coverage is intended for the whole island with a sample size of 33% which is estimated to be around 600 households. The main areas for monitoring are as follows:

1. Yaren 9. Ewa
2. Boe 10. Anetan
3. Aiwo 11. Anabar
4. Buada 12. Ijuw
5. Denigomoudu 13. Anibare
6. Nibok 14. Meneng
7. Uaboe 15. Location
8. Baitsi

3.2 Study Population

At the household level the survey is targeting All members of the Household; however, the main respondent will be the Household Head which could be either the Husband or spouse. If both are unavailable during the survey then any responsible adult will become the respondent. Additional information will also be sought from members of the household who are 15 years with respect to their economic activity and income earning activities

3.3 Sampling

The sampling frame will be based on the Census listing results from the October 30, 2011 Population and Housing Census. Households will be stratified in to 9 groups as follows:

Yaren Ewa/Anetan
Boe Anabar/Ijuw/Anibare
Aiwo Meneng
Buada Location
Ubenide

Within each stratum, households will be sorted by household size and approximately one third of households selected from each using a systematic skip.

All up, approximately 600 households will be selected in the survey, 50 each month for 12 months.

Weighting

Extracted from Report 2 - Nauru HIES 2012/2013 Methodology Information

3.6 BENCHMARKS AND WEIGHTING

As discussed in Section 3.2, the sample selection for the Nauru HIES was based on a frame extracted from the 2011 Population Census (30 September 2011). As the Nauru HIES commenced collection of data in the field in early September,

2012 (less than 12 months since the population census) this frame was not updated to account for any changes in population size since the actual census date.

In production of Nauru HIES estimates however, the population was updated to reflect estimated growth between the time of the population census date and the mid-point of the HIES field work (end of March, 2013). This was only performed for persons living in private dwellings.

Data Collection	
Data Collection Dates	start 2012-07-01 end 2013-06-30
Data Collection Mode	Face-to-face [f2f]
Questionnaires	
<p>A Questionnaire consisting of four Modules and a Weekly Diary covering 2 weeks was used for Nauru (NRU) Household Income and Expenditure Survey (HIES) 2013. Each Module covers distinct but connected portion of the Household.</p> <p>The Modules are as follows:</p> <ul style="list-style-type: none"> - Module 1: Demographic Information - Module 2: Household Expenditure - Module 3: Individual Expenditures - Module 4: Income - Diary Week 1: Covering the first 7 Days (1 - 7) - Diary Week 2: Covering the second 7 Days (8 - 14) 	
Data Collector(s)	Nauru Bureau of Statistics Office (NBSO) , Government of Nauru

Data Processing & Appraisal
<p>Data Editing</p> <p>Program: CSPro 5.1x</p> <p>Extracted from Report 2 - Nauru HIES 2012/2013 Methodology Information</p> <p>3.5.1 Data entry: Interactive Keying</p> <p>As with all surveys it is always better to correct errors in the field and within the smallest lapse of time between enumeration and processing. The field collection methodology allowed for a two-week enumeration window that gave ample time for survey teams to validate data collected. The data entry process took advantage of this window and allowed for questionnaires to be checked manually as well as systematically using the data entry program.</p> <p>Standard heads-down data entry practices use double-entry to ensure that data entered in the system truly mirrors information collected on the form. Because of the large amount of survey data collected in the HIES, tight project time frame, and a limited budget, a single-entry interactive system was used in the processing of HIES data. This data entry system aided in improved data quality by incorporating standard error checking specifications listed below.</p> <ul style="list-style-type: none"> • Validity - This process checked if the data entered in the system fell within established ranges associated with the data item. • Consistency - This process checked the relation between data items and within acceptable characteristics of the country such as employment, education ages or gender specific expenditures. <p>3.5.2 Data cleaning phase 1: Manual Cleaning</p> <p>Although a heads-up interactive system was used in the processing of HIES data, data errors are always inevitable. This can be contributed to a multitude of reasons and additional efforts must be made to have accurate data. Data cleaning Phase 1 was done in-country where access to original questionnaires allowed us to correct data by referencing source documents. Errors were identified using an edit specification program which checks keyed data for:</p>

- missing information
- value specific ranges
- data item relations
- sequencing errors.

Steps were taken to ensure that missing items were not replaced with assumed values from those involved with data corrections. Data items such as these were addressed in Data Cleaning Phase 2. Nauru HIES Report 2012/2013 Methodology information 17

3.5.3 Data recoding phase 1: Sub-records of related data items

The objective of this phase was to combine similar data items in the questionnaire into 17 unique databases. The process involved identifying questions and sections in the questionnaire that were related either by subject area, classifications, and transaction types. The advantages of these databases are listed below:

- Simplify data corrections - when the data is organised into liked data items, it makes for easier data corrections when implementing sub-routines to check for further data inconsistencies, outliers and code verifications.
- Allow for area specific analysis - because the data is organised into similar subject areas, classifications and transaction types, the emerging databases then can be used independently or cross-referenced to other databases.
- Simplify the creation of aggregated data - the overall intention of these sub-databases is to create four main databases used in the analysis of HIES data.

3.5.4 Data cleaning phase 2: Validation, Imputation and Removal

Before any data could be properly recoded into the main aggregated income and expenditure databases the information needed to be properly coded. After field collection this activity was very time consuming because each transaction needed to be verified for relevance and completeness. Activities in this process included:

- deletion of households having inefficient amount of diary transactions or missing large amount of data
- data item code validation and correction (e.g. COICOP, ISIC, and ISCO)
- imputation of missing or invalid data items
- deletion of transactions with insufficient data items.

3.5.5 Data recoding phase 2: Output

The final phase was to recode the sub-databases into the four main databases (Income, Expenditure, Person and House). The activities in this phase included quality control measures that checked for consistencies and balancing between:

- categories, reference periods and transaction types
- income and expenditure
- sub-databases and aggregated databases.

Accessibility

Access Authority	Director, Nauru Bureau of Statistics Office (Government of Nauru)
Contact(s)	Director, Palau Office of Planning and Statistics (Bureau of Budget and Planning)

Confidentiality

Extracted from the Field Work Instruction Manual (Attached):

1.3 Confidentiality

All information furnished will be kept confidential. The Nauru National Statistics Office currently operates under the guidance of the Statistics Act. The relevant sections of this Act, relating to the confidentiality issues of the survey are:

12. Every person employed in the execution of any duty under this Ordinance shall, before entering on his duties, make and subscribe before a magistrate, or other person authorized by law to administer oaths, an oath or affirmation in the form set out in Schedule 2.

13. (1) Any person, being employed in the execution of any duty under this Ordinance, who- (a) by virtue of such employment or duty becomes possessed of any information which might influence or affect the market value of any share, interest or other security, product or article, and who, before such information is made public, directly or indirectly uses it for personal gain; or (b) without lawful authority publishes or communicates to any person otherwise than in the ordinary course

of his employment any information acquired by him in the course of such employment; or (c) knowingly compiles for issue any false statistics or information, Shall be guilty of an offence and shall be liable to imprisonment for 2 years and to a fine of \$800.

(2) Any person , being in possession of any information which to his knowledge has been disclosed in contravention of this Ordinance, who publishes or communicates such information to any person shall be guilty of an offence and shall be liable to imprisonment for 2 years and to a fine of \$800.

(3) Any person who- (a) hinders or obstructs an authorized officer in the lawful performance of any duties or in the lawful exercises of any powers imposed or conferred upon him under this Ordinance; or (b) refuses or neglects- (i) to complete and supply, within such time as may be specified in that behalf, the particulars required in any return, form or other document left with or sent to him; or (ii) to answer any question or inquiries put to or made of him, under this Ordinance; or (c) knowingly or recklessly makes in any return, form or other document completed by him under this Ordinance, or in any answer to any question or inquiry put to or made of him under this Ordinance, any statement which is untrue in any material particular; or (d) without lawful authority or excuse, destroys, defaces or mutilates any return, form or other document containing particulars collected under this Ordinance; or (e) refuses without reasonable cause to grant access to records and documents in accordance with the provisions of section 9, shall be guilty of an offence and shall be liable to imprisonment for 1 year and to a fine of \$400.

Breaches of this contract can have significant impacts on the successful conduct of not only this survey but future surveys undertaken by the Government of the Nauru.

Breaches of the contract will also have an impact on the individual/s concerned in the sense that their pay can be docked and any other employment opportunities of this nature in the future will be lost.

Access Conditions
