SUMMARY

Welcome to the first edition for Nauru's International Arrivals Statistics 2016. Since this is a first edition there's a lot improvements which are highlighted as follows:

- One of the major improvements that are revealed in this analysis is the need for improvement of response on the arrival cards.
- Another is incorporating a missing component on the arrivals cards for analysis particularly for passengers to indicate their gender which is currently not available.
- Separate the question "Main Reason for Visit" for Residence and Non Residence which is currently contributing to a high non response for Returning residence.
